### Description

When selecting a experiment device in the cargo bay, the pop up into window gets stuck and cannot be closed. The window stay on the screen even after reloading the game, exiting to the main menu.

Something similar happened to me on PC when trying to set up a deployed sci base on a moon. I had to close the entire game and restart it to get rid of the phantom menu.

I also had issues at the same time with inventory items being stuck in icon mode instead of showing the actual piece once I grabbed them to place them on the ground, but I've only seen this once.
