Description

The mission 'Test RT-10 "Hammer" Solid Fuel Booster at the Launch Site' immediately fails on accepting the mission. This has been reported in the forums to happen also to the same mission but with the "Flea" Solid Fuel Booster instead [<https://forum.kerbalspaceprogram.com/index.php?topic/196830-can-anyone-get-the-flea-and-hammer-contract-to-work/>].

I actually experienced this today had no idea was a bug, assumed I got contract seconds before it expired and chalked it up to not paying attention!

Stock ksp, no dlc, visual mods only
