#### Description

Ive been trying to make rockets (without mods) and when i place certain parts they disappear and make it so i can place anything at all

The devs will need more information. I do know of something like that happening in KSP but can you be more specific?

A video or the steps taken would be appreciated, then I can try to replicate and then confirm

Can't load video here, less 20 Mb, avi, mp4, mov - error.

Ahh same bug as [#28022](#)

Someone else already reported it. Move the craft. let go. then pick it up again should fix it

##### #4 - 06/25/2021 06:34 PM - Aerothecat

what i mean is when i place certain parts like hinges they disappear and it makes it so every node is taken up some how and doesnt let me remove any parts but also doesnt allow me to save what i was making and instead have to make a new craft without saving

##### #5 - 06/25/2021 06:39 PM - Aerothecat

and its not just hinges ive had fuel tanks, engines, landing gear do it as well

##### #6 - 06/25/2021 08:35 PM - Anth12

so its a different issue. A video would be helpful Aerothecat

Aerothecat. Excellent video.

That issue isn't happening to me.

I would recommend getting steam to verify the files and if that doesn't work reinstall from scratch

##### #10 - 06/27/2021 08:09 PM - Aerothecat

ive already done that and i didnt help

**#11 - 06/27/2021 08:09 PM - Aerothecat**

it\*
