

Kerbal Space Program - Bug #28158

Maneuver Node UI bugs

07/02/2021 12:38 AM - Rocketry101

Status:	New	Start date:	07/02/2021
Severity:	Low	% Done:	0%
Assignee:			
Category:	UI		
Target version:			
Version:	1.12.0	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Making History		

Description

Hello. Im here to report a mindbending bug. Heres what happens: the maneuver node causing nullreferenceexceptions in the log and also causes settings menu to softlock the game, cause right click menu become unfunctional, and causes FPS to drop. Also causes the green "progress" bar to not exist.

Log link: (To big to upload here) <https://drive.google.com/file/d/1FRsgKgg6kZP-E1o0BGGdouaSVjLaV31c/view?usp=sharing>

Unknown if mod caused yet. Likely a mod though.

Reproduction steps: unknown, it just happened randomly and will never go away despite me reinstalling the whole game. (Using steam for KSP if that helps.)

Two category's: UI and frame rate

Versions: 1.11.2 and up.

History

A screenshot can be provided if needed

#2 - 07/02/2021 02:53 AM - jclovis3

- File KSP.zip added

Simply zip the log file next time. It compressed from 21.5 MB to 1.19 MB. See attached.

Can somebody come fix bug??

#5 - 07/07/2021 08:13 AM - Anth12

The bug looks mod related from the log file.

1.12 is having problems with some of the mods currently

You might want to remove all the mods and then add them back in one at a time until the problem mod shows itself

Then remove the mod until its updated, or go back to 1.11.2 until they are updated.

this issue was in 1.11.2 thats when it started. Also i already did removing then re-adding. In fact i did a full reinstall and it did not fix the issue
