

Kerbal Space Program - Bug #28248

Staging on Reentry Modules KV-1, KV-2 and KV-3

07/10/2021 02:28 AM - rafaeldominiquini

Status:	New	Start date:	07/10/2021
Severity:	Low	% Done:	0%
Assignee:			
Category:	Parts		
Target version:			
Version:	1.12.0	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

The option to disable staging on the reentry modules KV-1, KV-2 and KV-3 doesn't work right. Although it does disable the in-flight staging function, the icon still appears in the stage list!

History

I tested it here, and it worked normally for me. It's probably related to some mod. You have a lot of mods, it's good to test without them.

Other parts where it is possible to disable staging work normally!
I will test without mods and inform here.

I tested again without mods, and appears to be working right.
Sorry for the report. I think that this bug can be closed!

- I discovered that this bug is caused by MechJeb2!

Thanks.
