Description

I noticed that the **ModuleTestSubject** in some part configurations had a incorrect parameter defined in comparison to other part configurations.

In these modules the parameter **situationMask** was accidently replaced by **environments**.

MODULE

```
{
    name = ModuleTestSubject
    environments = 15 // This should be situationMask
    useStaging = False
    useEvent = True
}
```

And a quick search in all files gave me this list:

KSP_win\GameData\Squad\Parts\Wheel\LandingGear\GearExtraLarge.cfg
KSP_win\GameData\Squad\Parts\Wheel\LandingGear\GearLarge.cfg
KSP_win\GameData\Squad\Parts\Wheel\LandingGear\GearMedium.cfg
