

## Kerbal Space Program - Bug #28393

### SAS icons gone on all ships

08/04/2021 03:35 AM - clyvedereksan

<b>Status:</b>	New	<b>Start date:</b>	08/04/2021
<b>Severity:</b>	Low	<b>% Done:</b>	0%
<b>Assignee:</b>			
<b>Category:</b>	SAS		
<b>Target version:</b>			
<b>Version:</b>	1.12.2	<b>Language:</b>	English (US)
<b>Platform:</b>	Windows	<b>Mod Related:</b>	No
<b>Expansion:</b>	Core Game		

#### Description

since update 1.12.2 I cannot use prograde/retrograde or the other directional markers. Only the stability assist icon is still there, all the rest have disappeared completely. This is on all ships regardless of manned/unmanned, including ships which had functioning SAS systems yesterday. The game is unplayable without this, please fix! Thanks.

Are you sure you're using probe cores or crew members that are supposed to have other SAS capabilities? For example a QBE or OKTO can't hold prograde/retrograde (see [https://wiki.kerbalspaceprogram.com/wiki/Command\\_module](https://wiki.kerbalspaceprogram.com/wiki/Command_module)). There was previously a bug that sometimes made all SAS modes available on any command module ([#27162](#)), but it seems like it might have been fixed in 1.12.2.
