

Kerbal Space Program - Bug #28558

Stage stats not updating when KAL is connected to thrust limiter

10/10/2021 12:31 AM - Entropian

Description			
Pretty much stated in the title. When a KAL is bound to thrust limitation and moved around (to change value), the stage stats on the sidebar fail to show updated information. For example, when using a KAL to change the thrust limiter from 100 to 50 on any given engine, the TWR on the stage sidebar remains at the value for the engine at 100. This does not happen when the thrust limiter slider is moved manually.
