

Kerbal Space Program - Bug #3549

Node delta V UI is affected by which science option you hover over

11/23/2014 05:20 AM - mattihase

Platform:	Any	Mod Related:	No
Expansion:			

Description

i was playing sandbox and decided to take a crew report while i was transfer burning to dres because why not and when i hovered over the buttons on the science report and the length of the grey space after the delta v remaining after node extended, varyingly depending on what button i hovered over

i am running mods (alarm clock, an action group manager from before toolbar plugin (which amazingly still seems to work), TAC fuel balancer, module manager is in there, custom biomes, coherence contracts, fine print, trajectories, the ip transfer porkchop plotter thing, a modified folding wing from the remotetech 1 aeroprobe and a few custom flags.

i've also just unzipped and tested a stock install: the same thing happens.
and also in x64 and science sandbox (so also presumably career).

it may be in older versions but i don't have any at hand.

good luck with the bugbusting.

History

#1 - 11/23/2014 12:03 PM - quietghost

- Subject changed from KSP_WIN_0.25 node delta V UI is affected by which science option you hover over to Node delta V UI is affected by which science option you hover over

- Status changed from New to Confirmed

- % Done changed from 0 to 10

- Platform Any added

- Platform deleted (Windows)

Nice find. Confirmed with completely stock on win32. It looks like a GUI issue, which would be affected across all platforms.

#2 - 11/23/2014 03:40 PM - Squelch

- Category changed from 30 to 36

Confirmed here too.

The width of the UI dV text field does mirror the tooltip width when mousing over the science report dialogue buttons.

Forwarded.

#3 - 07/17/2016 09:27 AM - TriggerAu

- Status changed from Confirmed to Needs Clarification

- % Done changed from 10 to 0
