

Kerbal Space Program - Bug #3844

VAB part selector not reacting to clicks

12/16/2014 03:29 AM - tko

Status:	Closed	Start date:	12/16/2014
Severity:	Low	% Done:	100%

Target version:			
Version:	0.90	Language:	English (US)
Platform:	OSX	Mod Related:	No
Expansion:			

Description

The part filter buttons in VAB are ignoring some clicks. When I click on a button it's changing its color as reacting to the click, but the parts listing doesn't change. If I click a little harder - as in, physically press down the trackpad rather than just tapping it like a touchscreen - the parts listing changes as well. This was not happening with 0.25

MacBook Pro Retina
OS X Yosemite 10.10.1
"Tap to click" enabled in System Preferences

I also had this problem in older versions of KSP: a trackpad tap (not click) would produce a reaction as if I had clicked but only actually pick the part for placement about 10% of the time. (Trackpad clicks always worked fine.)

This seems to be fixed; in 1.1.3 I can reliably pick and place parts without having to physically click the trackpad.

I think you meant to mark this as closed rather than confirmed.
