Target version:	1.0		
Version:	1.0	Language:	English (US)
Platform:	OSX	Mod Related:	No
Expansion:			

Description

See Screenshot. I'm using both LY05 and LY-01 landing gear, yet the Design checklist still warns me that I should add landing gear

History

Can verify for Windows 7 64 bit OS, noticed the same thing on my first aircraft. <http://imgur.com/wQizWmn>

In KSP.log noticed the error: [ERR 12:23:37.875] WheelCollider requires an attached Rigidbody to function. When loading various gear models. Possibly related?
