

## Kerbal Space Program - Bug #4851

### "Untracking" lost-in-space missions aren't re-trackable making completion very difficult

#### Description

If the user accepts a "rescue X from space" type mission, it's possible through the Tracking Station to un-track that object. The orbit and altitude is then hidden.

If the tracking station is below level 3, it's not possible to re-track this object making completing the mission almost impossible as it can't be targeted.

To reproduce:

Have tracking station < Level 3

Accept a "rescue from space" mission

Untrack the object

Try to complete the mission or re-track the object (and good luck to you!)
