

Kerbal Space Program - Bug #5154

After 1.0.3 In-flight craft frozen/uncontrollable

06/22/2015 11:40 PM - IAmSparticle

Status: Duplicate	Start date: 06/22/2015
Severity: Normal	% Done: 100%
Assignee:	
Category: Gameplay	
Target version:	
Version: 1.0.3	Language: English (US)
Platform: Windows	Mod Related: No
Expansion:	
Description build id = 00859 2015.06.22 at 20:02:33 CEST Branch: master When switching to the in-progress Mun MkII flight, the view switches as expected, but the following things are wrong: <ul style="list-style-type: none">• Time starts out frozen, although it shows 1x warp. Can start it flowing by increasing to 2x, then back to 1x• Kerbal display missing from lower-right corner• Parachute stage is missing in lower-left corner• Control inputs (WASD) don't seem to work either• Right-clicking any part doesn't activate any buttons it may have.• Atmosphere interactions don't work. The craft dips to approx. 63 km with no drag.• On the map screen, can't interact with the orbit at all * From other craft or the tracking center the orbit does highlight.

Heres something that one of the reddit users found that sounds like the fix for this - http://www.reddit.com/r/KerbalSpaceProgram/comments/3asi15/uncontrollable_craft_kraken_fix/

Make sure you backup your save and do let us know if it fixes it

#2 - 06/23/2015 01:52 PM - IAmSparticle

Yes, that fixed it for me.

FWIW, only the line
attN = bottom, -1
was missing for me.

Thanks for the help.

- Status changed from New to Duplicate
- % Done changed from 0 to 100

I restored the original, unedited save.
The fix in 1.0.4 fixed my issue, the craft is controllable and active again.
Thanks.
