

Kerbal Space Program - Bug #5155

Craft parts inaccessible / uncontrollable after 1.0.3 update

06/22/2015 11:57 PM - ochristy

Status:	Closed	Start date:	06/22/2015
Severity:	Normal	% Done:	100%
Assignee:	Ted		
Category:	Gameplay		
Target version:	1.0.4		
Version:	1.0.3	Language:	English (US)
Platform:	Any	Mod Related:	No
Expansion:			

Description

Similar issue to Bug [#5154](#)

- Parachute stage is missing in lower-left corner
- Control inputs (WASD) not functional
- Buttons Z and X cause the craft to fly off screen and 1x speed is displayed as it disappears.
- Cannot switch vehicles or activate any lights, gear or staging.
- Right-clicking any part doesn't activate any buttons it may have only displays status.

History

#1 - 06/23/2015 01:16 AM - ochristy

Forgot Steps:

- Updated to 1.0.3
- Open program and load previous career save file
- Go to tracking station and select Wink-orb-one and "Fly"

#2 - 06/23/2015 10:24 AM - TriggerAu

Heres something that one of the reddit users found that sounds like the fix for this - http://www.reddit.com/r/KerbalSpaceProgram/comments/3asi15/uncontrollable_craft_kraken_fix/

Make sure you backup your save and do let us know if it fixes it

#3 - 06/23/2015 10:39 AM - Squelch

I note that mods are in use which makes it difficult to reproduce effectively with the supplied save. If the fix works, then please do report back, but could someone also upload a clean save to verify?

#4 - 06/23/2015 12:49 PM - ZenithRising

- File *persistent.sfs* added

Experiencing this same issue on a Mac with an unmodded install. However, it only effects one craft, the "Duna Express III" on an escape trajectory near Duna.

Attached is the save. I wrote a detailed bug report in the forum:

<http://forum.kerbalspaceprogram.com/threads/126333-1-0-3-Craft-in-flight-before-update-now-unflyable-%28time-frozen-controls-stuck-display-issues-%29>

#5 - 06/23/2015 04:26 PM - ochristy

Modification to my sfs file as suggested by TriggerAu and adding attN = None, -1 to two heatshields fixed this problem for me.

Thank you.

- Has duplicate Bug #5156: Craft Frozen after 1.0.3 update. No control, Kerbin texture displays white sphere added

#9 - 06/25/2015 01:27 AM - nogal

- File persistent.sfs added
- Status changed from Ready to Test to Not Fixed
- % Done changed from 80 to 50

Hey.. I experiencing the same issue with version 1.0.4 and a craft with absolutely no heatsheids, small command pods, or any other reported items in the reddit that were described. I do have 'Kerbal Engineer' (delta-v calculations) as a mod installed, though none of my other ships with that part attached seem to be affected.

I've attached my persistent.sfs, the ship in question is 'Kerbin Station' in a polar orbit around Kerbin.

#10 - 06/25/2015 01:28 AM - nogal

Note: I'm running on Slackware using the Steam install.

#11 - 06/25/2015 07:39 AM - TriggerAu

- Status changed from Not Fixed to Ready to Test
- % Done changed from 50 to 80

The issue in this case, and the fix in 1.0.4 was specifically to do with heat shield parts and the issue there. Will put this one back to ready to test for ochristy and create a new one for yours nogal
