

Kerbal Space Program - Bug #5901

KSP Missing Parts, unmodded

11/10/2015 08:12 AM - Hiyu

Status:	Not a Bug	Start date:	11/10/2015
Severity:	Low	% Done:	0%
Assignee:			
Category:	Parts		
Target version:			
Version:	1.0.5	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:			

Description

After reinstalling the game and copying over my saves, I'm missing some parts e.g. the small nose cone and Air Intake. The saves were from the same day. I reinstalled to a different drive after a visual-overhaul mod pack went wrong. The pack's files did not overwrite anything in the saves folder, and the installation on the original drive was wiped.

So far I've tried reinstalling the game again, verifying integrity of game cache, and deleting all files except saves folder. Scenarios and Training folders are fresh as well.

History

#1 - 11/10/2015 10:29 AM - Ted

- Status changed from New to Not a Bug

- % Done changed from 0 to 100

This is due to the parts being moved around on the tech tree.

Please see the following thread for a workaround on this issue -
