Description

Hi,

i just installed 1.0.5 and try to connect complex structure to a ship radial and with 4x symetrie .

Result:

The .craft file includes the ship.

- connection symbols freeze on position
- cant do anything
- if i try to leave VAB the Buttons get grey

I need to kill KSP Task and restart. Everythime i try this aktion, i get the same result.

Windows 7 64 Bit
KSP 1.0.5
Mod Mechjeb only

I never was a frend of the VBA usability but love your game and the way it is made.

Go on and thank you !
