<b>Platform:</b>	Windows	<b>Mod Related:</b>	No
<b>Expansion:</b>			

#### Description

##### DESCRIPTION:

For some landed vessels the reported longitude in the tracking station exceeds 180°, which is the maximum theoretically possible value (180°W to 180°E).

##### HOW TO REPRODUCE:

Unknown. Affected savegame is attached, with screenshot. For now I only noticed this on the vessel landed on the Duna north pole and its nearby flag.
