

## Kerbal Space Program - Bug #6947

### Phantom green orbit in Tracking Station, and apoapsis/periapsis marker inside Kerbin

02/12/2016 07:01 PM - GalFisk

#### Description

When opening Tracking Station, there's a green orbit with no markers. Inside Kerbin is an AP and PE marker in the same color which belongs to Sean's Cannery, but there are no proposed or active contracts for this one.  
If I build a satellite, the AP+PE marker will follow it. The orbit will not be visible in map view when flying this vehicle.

#### History

##### #1 - 02/15/2016 02:59 PM - Kasuha

Problem tracked down to this finished contract record:

```
CONTRACT_FINISHED
{
  guid = f32518bd-1c70-4133-8413-b8c9a975f3e8
  type = SatelliteContract
...
  agent = Sean's Cannery
...
  PARAM
  {
    name = VesselSystemsParameter
    state = Incomplete
...
  PARAM
  {
    name = SpecificOrbitParameter
    state = Incomplete
...
  PARAM
  {
    name = StabilityParameter
    state = Incomplete
```

After removing this complete entry from the list in persistence file and restarting KSP, the marker was gone.  
Probably a contract forced to finish through debug menu?

##### #2 - 02/15/2016 04:06 PM - GalFisk

Thanks, I'll remove it from my savefile. No contracts were forced to complete and F12 was never used, so I don't know how this happened. I did cancel another contract earlier, possibly from Sean's Cannery, because the proposed orbit intersected Mun.  
I'll get back to you if I find a way (ingame without F12, of course) to reproduce the issue.
