

Kerbal Space Program - Bug #8152

Very cool new glitch - dev mode left on from update maybe? slotmachine type affect Money pouring in when loading a game.

Description

Ok I really struggled if I should post this or not, but if you load a saved game now just stay on that view of your space center & look at the money it keeps going up - like a slot machine, it seems to go up about 100k every half second to second. I am playing career mode so started the save game at about 1.3million, and as I post this it is went past 99 million and still going whoo-hoo. I'm rich! I am worried about eventual overflow- lol.

I even tested going into a building and coming out and money starts going up again.

I am wondering if it is a dev mode? I think I am first to see this one. :) you can thank me later.
