Description

Build 1209, 1.1 Pre-release

It appears that keyboard shortcuts are still active when using the search filter for parts. It looks like this is causing several issues:

- 1) If the hotkey is the **first** letter typed: The layered UI will start "flickering". This is resolved by leaving the VAB and returning. No program restart. The hotKey, correctly, does not work (ie, "R" won't switch modes)
- 2) If the hotKey is the **second or later** letter typed: The UI does not start flickering, but the hotKey is active. For example, searching for "battery" will switch symmetry modes because it contains the letter "R".

History

#1 - 04/27/2016 12:14 AM - Caldvan

Can't reproduce in 1.1 release build

#2 - 07/17/2016 09:46 AM - TriggerAu

- Status changed from New to Needs Clarification

#3 - 08/09/2019 04:36 PM - chris.fulton

- Status changed from Needs Clarification to Resolved
- % Done changed from 0 to 100

#4 - 08/09/2019 04:36 PM - chris.fulton

- Status changed from Resolved to Closed
