

Kerbal Space Program - Bug #9347

In symmetry attached parts show only one entry in the flight event log, when destroyed at the same time

Description

In symmetry attached parts show only one entry in the event log, when destroyed at the same time - multiple entries, when not destroyed at the same time.

Reproduce:

- 1) Grab a Mk1 Cockpit.
- 2) Add a bicoupler to it.
- 3) Add 2 tanks in symmetry.
- 4) Launch and try to destroy the tanks. I used Whack-a-Kerbal to test it, other methods work aswell. Revert and repeat as necessary.

Expected: The log shows one entry per destroyed part.

Observed: If the two tanks are destroyed at the same time, the log (F3-Screen) shows only one entry. If the tanks are destroyed with at least one second of time between, the log shows two entries.

Note: Used Whack-a-Kerbal for ease of test hear, noticed it on some planes first. It doesn't matter how the destruction happens.
