Description

As you can see in the picture, I have pitch input, but the fins aren't registering the pitch. They register Roll and Yaw just fine though.

Note: No errors in the debug_log either.

Nevermind it turns out a reload of the craft did the trick. However the FATASS wing has a graphical glitch on it in the VAB when you hover your mouse over it.

#2 - 04/21/2016 12:09 PM - sal_vager

- Status changed from New to Closed

- % Done changed from 0 to 100

Okay, glad the reload fixed it :)
