Description

Probably related to #8174.

Crash occurred directly after decoupling the first stage.

Unable to reproduce here, does this happen all the time for you or was this a single event?

Can you find a means to cause this reliably?

It may be linked to issue #8241. I too have had a few CTDs after decoupler stages in-flight, but it is not as easily reproduced.

I think I may have had it once or twice more. There is not much more I can tell you, unfortunately.

My game now also seems to crash randomly, to be honest.
