Description

It appears that in the VAB I get CTD after certain periods of time. It doesn't seem to be attached to any part specifically, or anything I am doing. It just happens after a period of time has past. I also notice that when in the VAB, my computer runs very hot and the fan is very active.. This is not experienced anywhere else

History

#1 - 04/25/2016 06:11 AM - SunburstMoon

This is very likely a duplicate of issue #8241 from pre-release.

#2 - 07/17/2016 09:47 AM - TriggerAu

- Status changed from New to Needs Clarification
