

Kerbal Space Program - Bug #9549

Shouldn't be able to scale this hill. Yet somehow by breaking and applying thrust, I am.

Description

So I'm trying to scale some mountains in a little yet car. I only packed Juno's and I'm heavy, so they don't pack enough punch to scale steep cliffs. I realized I could burn off fuel while braking for twenty minutes or so, become lighter, then try again.

Except the weirdest thing is happening instead. Breaks on, I slide down. Breaks on and the two jets at 100%, I go up? Only at 0.1 m/s, but I'm going up on a hill that should be too steep for me. Curious. Check out the save for yourself.

Didn't I attach it? Trying again.

#2 - 04/28/2016 04:29 PM - Tricky

Okay it is there after all.
