Description

This is for version 1.1.1 but it wasn't listed in the Version dropdown.

Clicking on 'Stage View' in the Resource Panel causes a NullReferenceException and the panel remains blank until scene reload.

Staging after the NRE will also spam the Debug Console with NRE's.

I have a similar issue on a modded installation, the stage toggle is missing and only some entries are also missing. I don't think this was present before 1.1.1 hit, and I'm not sure if I accidentally hit the toggle or not.

Might be worth noting that the now unlisted resources still function fine. I was able to use up LF+O, and Ore still got collected and used. It seems like only the resource panel is broken.

KSP 1.1.2 x32/x64 Win

Stage View displays correctly now in 1.1.2 and toggles on and off without problem. I would say this is resolved.
