Description

Hi,

When I have a rocket sitting on a RE-I5 skipper on the launch pad (for example a cockpit, two X200-32 and a RE-I5) with engine and SAS off and without touching any key, the rocket starts rotating and wobbling more and more until it crash on the side.

I tried it on both 32 bits and 64 bits 1.1.1 unmoded clients with a fresh new game.

History

#1 - 05/06/2016 01:18 AM - FuelX

The issue is resolved in 1.1.2

Thanks!
