Kerbal Space Program - Bug #9685

Main menu clicks don't register is mouse button held

05/04/2016 10:31 PM - mpurgar

Status:	Needs Clarification		**Start date:**	05/04/2016
Severity:	Unworthy		**% Done:**	0%
Assignee:				
Category:	Controls and UI			
Target version:				
Version:	1.1.2		**Language:**	English (US)
Platform:	Windows		**Mod Related:**	No
Expansion:				

Description

Steps to Replicate:
Click and hold mouse button on any main menu (or "Start game" menu) choice for more than ~1/2 second.

Expected:
Click should register regardless of how long the mouse button is held (trigger on mouse-up event)

Result/Observed:
Mouse click does not register unless the click is fairly rapid (< 1/2 sec)

Note:
Menu graphics respond properly regardless of click duration.

Verified this is a bug in:
1.1.0.1230 Win 64 and 32 bit
1.1.2.1260 Win 64 and 32 bit (Fresh out-of-the-ZIP install)

Not sure why you need to click and hold for more than a second....

I stumbled upon it by accident, clicking very deliberately in order to help synch a screen capture video with separate microphone audio. Yes, it's very unlikely anyone would notice and even less likely anyone would care... hence "Unworthy" priority. Still a bug, though, so I'm doing my civic duty!
