<div>Description</div> <div>Hi,</div> <div>KSP creates 2 additional directories under Linux in "~/.config/unity3d" :</div> <div><div><div>• Squad/</div><div>• SQUAD/</div></div></div> <div>One contains additional configuration files for KSP and the other does the same for the Launcher. The Launcher is in the all-capitalized one; it would make sense to unify these.</div> <div>This has been the case since at least 0.90, and verified with 1.0.4 (not an option in your version drop-down).</div> <div><pre>micha@urutu:~/.config/unity3d\$ tree +-- global.prefs +-- Player.log +-- Squad -- Kerbal Space Program +-- Player.log -- prefs +-- SQUAD -- KSPLauncher +-- Player.log -- prefs</pre></div> <div>So while it might be a semantic nitpick I do consider this to be a (very very minor) bug.</div>
